

The Opportunity to Invest in Safer Chemicals GreenScreen™ for Safer Chemicals

A training opportunity brought to you by

Save the Date!

May 8, 2012 | Ann Arbor, MI
Hosted by NSF International

The GreenScreen™ for Safer Chemicals is a method developed by Clean Production Action. It is used by several organizations, including HP, to evaluate the hazards associated with specific chemicals and identify safer alternatives.

This day-long training will be of particular interest to business experts in supply chain management, materials selection, procurement, product and process design, environmental health and safety, sustainability, and regulatory affairs who need to select safer chemicals for their products.

For more information please contact Clean Production Action at greenscreen@cleanproduction.org
Visit: <http://www.cleanproduction.org/Greenscreen.php>

NSF is also hosting the 7th Annual Green Chemistry and Commerce Council (GC3)
Innovators Roundtable

GC3 7th Annual Innovators Roundtable

May 9-11, 2012 | Ann Arbor, MI

Hosted by NSF International

Join the GC3 business-to-business networking event for cross-sectional collaboration, and sharing of information and experiences about the challenges to and opportunities for safer chemicals and products.
