TEXTILE GUIDE

Current situation

- Lack of supply chain information
- Industry top dogs shifting from rsl to mrsi
- Industry is advanced in many areas – chemicals management not one of them
- Others are scrutinizing industry with the help of technology

SINimilarity

-Or, how to navigate unknown chemical waters

- The SINimilarity tool is based on structural resemblance
 - Overall structure
 - Toxicophores
- Can identify substances similar to SIN List substances from a dataset of approximately 500'000 substances
 - Search by CAS#, EC#, Name or Structure (SMILES)
- The aim is to **Empower downstream users**
 - Help them avoid regrettable substitution
- Easy to use web-based tool
- Raising a warning flag

SEARCH THE SINIMILARITY TOOL

And we can identify if your chemicals are linked to any in the SIN List by group, structure or both.

Showing 1 of 1 results for "**17696-37-6**" in the SINimilarity tool.
 No results found on the [SIN List](#).

CAS Number	Name	SIN Groups	Matches in SIN List
17696-37-6	4-tert-butyl-2,5-xylenol	Alkylphenols	3 matches 
732-26-3	2,4,6-Tri-tert-butylphenol	Alkylphenols	OPEN FACT SHEET
128-37-0	ButylatedHydroxytoluene	Alkylphenols	OPEN FACT SHEET
98-54-4	4-Tert-Butylphenol	Alkylphenols	OPEN FACT SHEET

Chemical knowledge vs. expertise

Summary

chemsec
TEXTILE GUIDE

- Offers a modern approach
- Standardized chemical information
- A one-stop shop for chemicals management

chemsec
SINIMILARITY

- Empowers also non-chemists
- Helps prevent regrettable substitution
- Flag for potential hazards

Thank You For Listening

I'll be answering questions soon
